

Villa Markisa

Private Beach Bungalows

Workshop Agenda

Day 1 – Participants arrive, check-in

Dive & Photo gear set up

PM – Welcome, Introductions, Dave gives overview of workshop

Day 2 – 2 dives / night dive (optional)

Afternoon – share stories, review morning photos etc.

Afternoon/pre-dinner – **Geology of Tulamben presentation.** This presentation will discuss the geology of the region, and why the area supports the great diversity of species it does today. You will learn how Plate Tectonics and volcanic and seismic activity have created the regions unique bathymetry and water current movements.

Day 3 - 2 dives / night dive (optional)

Afternoon – share stories, photos, discussions, ID's etc.

Afternoon/pre-dinner – **Coral Reef Associations presentation.** This presentation will look at the many relationships species have with one another. We will discuss symbiosis, protective resemblance, camouflage, mimicry and warning coloration.

Day 4 - 2 dives / night dive (optional)

Afternoon – lab observations, discussions, ID's etc.

Afternoon/pre-dinner – **Nudibranch presentation**. The presentation will discuss classification, evolution, sensory organs (how they see, smell, hear, taste and breathe), locomotion and bazaar body movements, feeding, reproduction, defense mechanisms, the importance of their colors (protective resemblance, camouflage, mimicry and warning coloration).

Day 5 - 2 dives / night dive (optional)

Afternoon – lab observations, discussions, ID's etc.

Afternoon/pre-dinner – continue **Nudibranch presentation**.

Day 6 - 2 dives

Afternoon – lab observations, discussions, ID's etc.

After dinner – Summary of workshop – **Highlight's** – Bali Entertainment

Day 7 – Participants leave.
